TEX-PIRG INTERROGATORY REQUESTS OF THE APPLICANT (FOURTH)

Pursuant to 10 CFR 2.740b, the Texas Public Interest Research Group, an intervenor in this proceeding, propounds the following interrogatories to the Applicant, Houston Lighting and Power Company:

1. In calculating that the reactor vessel can be transported on the San Bernard River without channelization, provide the relevant barge design characteristics assumed. Include the "tons per inch" immersion factor for the barge, the weight of the barge itself, and the dimensions of the barge.
2. Is a barge of the size and type described in the response to #1 above readily available to the Applicant? Provide some basis of knowledge indicating the availability of that type barge.
