Director of Nuclear Reactor Regulation
Attn: R. W. Reid, Chief
Operating Reactors Branch No. 4
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Sir:

Three Mile Island Nuclear Station Unit 1 (TMI-1)
Operating License No. DPR-50
Docket No. 50-289
Decay Heat Pumps

Mr. G. B. Zwetzig of your office has indicated that the NRC requests Metropolitan Edison Company's position with respect to the TMI-1 Decay Heat Pumps. Met-Ed has, through extensive investigation and ongoing pump testing, verified the reliability of the TMI-1 installed shafts. However, in order to delete the requirement for quarterly vibration and ultrasonic testing of the installed shafts per our September 8, 1977 commitment, Met-Ed has scheduled shaft replacement for the forthcoming refueling outage. Should conditions evolve that make shaft replacement impracticable during the outage, Met-Ed will continue the quarterly vibration and ultrasonic testing until such time shaft replacement is practicable.

Sincerely,

J. G. Herbein
Vice President-Generation
