Event Report 76-11/3L (Follow-Up Report)

Dear Sirs:

Investigation into the seismic qualification of the TMI-1 steam generator pressure and level indicators is still being conducted. Although we have ascertained that the pressure transmitters and the racks for level instrumentation are seismically qualified, other pertinent information has not yet been received. We will submit a complete report as soon as all the necessary information is obtained.

Sincerely,

*R. C. Arnold*
