Dear Sirs:

Operating License No. DPR-50
Docket No. 50-289

In accordance with the Technical Specifications for our Three Mile Island Nuclear Station Unit 1 (TMI-1), a preliminary report of Abnormal Occurrence 50-289/75-14 was made to Region 1 on May 23, 1975. On this date the motor shaft of the B Decay Heat River Water Pump (DR-P-1B) sheared while running the pump. An investigation is currently in progress to determine the reason for the failure but as several vendors are involved, additional time will be required to complete the investigation and file a complete report. We anticipate providing a full report on AO 75-14 by June 6, 1975.

Sincerely,

R. C. Arnold
Vice President
