Director of Nuclear Reactor Regulation
Attn: R. W. Reid, Chief
Operating Reactors Branch No. 4
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Sir:

Three Mile Island Nuclear Station, Unit 1 (TMI-1)
Docket No. 50-289
Operating License DPR-50

Your letter of December 17, 1976 forwarded questions concerning an integrated reactor surveillance program proposed by the Babcock and Wilcox Company (B&W). Responses to these questions were forwarded in our letter, GQL 0066, dated January 20, 1977. Your December 17 letter also requests a description of any additional program we plan to implement to satisfy the requirements of 10CFR50, Appendix G, Paragraph V.C.

The responses forwarded in our January 20 letter address additional surveillance capsules and test reactor data as part of a B&W User's Group integrated materials irradiation program which is designed to obtain the data required to conform to Appendix G, Paragraph V.B. Paragraph V.C. of Appendix G is also considered in the development of this program should the initial results of the materials irradiation program indicate conformance with this paragraph is necessary.

Sincerely,

R. C. Arnold
R. C. Arnold
Vice President
