Director of Nuclear Reactor Regulation  
Attn: R. W. Reid, Chief  
Operating Reactors Branch No.  
U. S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Dear Sir:

Three Mile Island Nuclear Station, Unit 1 (TMI-1)  
Docket No. 50-280  
Operating License No. DPR-50

By your letter of June 9, 1976, you requested that Met-Ed forward, by July 14, a schedule for providing you with an evaluation of the adequacy of the pressure vessel supports. Met-Ed plans to meet with other Babcock and Wilcox Nuclear Steam Supply System users in order to accomplish this in a combined effort. In order to provide you with a realistic schedule, we request that we be allowed to submit our plans by August 25, 1976. Your cooperation in this matter would be appreciated since it would allow Met-Ed considerable savings and the opportunity to utilize the technical resources available as a result of such a cooperative effort.

Sincerely,

*R. C. Arnold*
