Regulatory Docket File

Director of Nuclear Reactor Regulation
Attn: Robert W. Reid, Chief
Branch No. 4
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Mr. Reid:

Three Mile Island Nuclear Station, Unit 1
Docket No. 50-289

It has been brought to our attention that the Commission will issue revised guidance regarding the implementation of Appendix I Technical Specifications, about September 1, 1976. Since we expect this new guidance will have an impact on the revision to Technical Specifications which we will propose, we intend to delay our submittal (scheduled for August 15, 1976).

It is our intent to inform you of a new submittal date within thirty days after receipt of the revised guidance. This will allow sufficient time for our staff to assess the impact of that guidance on the proposed Technical Specifications.

Sincerely,

R. C. Arnold
Vice President
