Mr. R. W. Reid, Chief  
Operating Reactors Branch #4  
Division of Operating Reactors  
U.S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Dear Sir:

Operating License No. DPR-50  
Docket No. 50-289

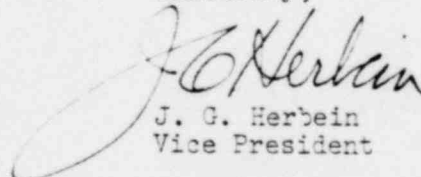

On June 8, 1977, we received your letter requesting that, by July 22, 1977, we compare the current design of the emergency power systems at Three Mile Island Nuclear Station, Unit I with the Staff Positions stated in your enclosure and:

- 1) propose plant modifications as necessary to meet the Staff Positions, or
- 2) provide a detailed analysis which shows Three Mile Island Nuclear Station, Unit I design has equivalent capabilities and protective features.

Additionally, you requested a Technical Specification Change Request to the operating license consistent with the Model Technical Specifications, along with a schedule for the completion of any Unit I associated modifications.

We have completed our response to the first of the three requests and are now reviewing a Technical Specification Change Request to comply with the second request. However, we have not compiled a schedule of associated modifications and therefore, Metropolitan Edison Co. is requesting an extension of thirty-one (31) days (until August 22, 1977) to forward our complete response concerning onsite emergency power systems.

Sincerely,

  
J. G. Herbein  
Vice President
