We do not consider approval of this change necessary for Cycle 2 operation; however, approval of this change at the same time as or immediately following approval of the above referenced exemption would serve to eliminate any potential confusion. Your prompt action on this matter is therefore requested.

Sincerely,

R. C. Arnold
Vice President

Director of Nuclear Reactor Regulation
Attn.: R. Reid, Director
Operating Reactors Branch No. 4
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Sir:

Three Mile Island Nuclear Station Unit 1
Docket No. 50-289
License No. DPR - 50
Technical Specification Change Request No. 32

Attached are three signed originals (thirty-seven conformed copies sent separately) of Technical Specification Change Request No. 32, requesting amendment to Appendix A of Operating License No. DPR-50. As a part of this request, proposed replacement pages for Appendix A are also attached.

Also attached is one signed copy of a Certificate of Service of Technical Specification Change Request No. 32 to the chief executives of the township and county in which the facility is located.

Since TMI-1 must be operated during Cycle 2 with the Reactor Vessel surveillance Capsules removed and 10CFR50 Appendix H appears to anticipate the continual presence of these Capsules in the vicinity of the core, an exemption to Appendix H paragraph II.C.2 is necessary. In this regard an exemption to Appendix H has been requested separately. It is, however, our understanding that you desire that Technical Specifications address the fact that the Surveillance Capsules are not to be installed for Cycle 2 operation but must be re-installed prior to Cycle 3 operation.

In addition, we are taking this opportunity to revise our surveillance capsule withdrawal times to conform to the schedule specified in Appendix H paragraph II.C.3.C, which applies to our vessel, and to clarify other requirements.
