Mr. George Lear, Chief
Operating Reactors Branch #3
Directorate of Licensing
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Mr. Lear:

Three Mile Island Nuclear Station, Unit 1 (TMI-1)
Docket No. 50-289
Operating License No. DPR-50

As a follow-up to our letter of May 2, 1975, and in response to your letter of April 11, 1975--regarding three remaining areas of disagreement between what you would like to see in the air treatment related sections of our TMI-1 Technical Specifications, and our position on the subject areas--please be advised that

1. we have again reviewed your intended requirements and our previously stated position on the three subject areas,
2. we still do not understand the bases from which you have concluded that the subject Technical Specification changes need to be made,
3. although we have verbally communicated our concerns over the phone with members of your staff, apparently we have not adequately communicated these concerns, and
4. in light of the previous discussion, it is recommended that members of both of our staffs meet to further discuss the issues in question.

In pursuance of Item 4 above, I have asked members of my staff to contact Mr. Jaffe to arrange such a meeting. It is my feeling that this issue can thus be most expeditiously resolved to our mutual satisfaction.

Sincerely,

R. C. Arnold
Vice President
