Regulatory Docket File

Director of Nuclear Reactor Regulation  
Attn: Mr. R. W. Reid, Chief  
Operating Reactor Branch No. 4  
U.S. Nuclear Regulatory Commission  
Washington, D. C. 20555

Dear Sir:

Three Mile Island Nuclear Station, Unit 1 (TMI-1)  
Docket No. 50-289  
Operating License No. DPR-50

In accordance with the requirements of TMI-1 Technical Specification 4.4.1.1.8 and 10CFR50 Appendix J, Section V.B, enclosed please find twelve (12) copies of the 1977 TMI-1 Reactor Containment Building Periodic Integrated Leak Rate Test Report. Since the initial and first periodic integrated leak rate tests have both failed to meet the applicable acceptance criteria, TMI-1 Technical Specification 4.4.1.1.6.b and 10CFR50 Appendix J, Section III A.6(a) require that the test schedule applicable to subsequent tests will be subject to review and approval by the NRC. The next test is presently scheduled for the 1980 refueling outage.

Sincerely,

J. G. Herbein  
Vice President-Generation
