IN REPLY REFER TO:

FEB 9 1968

Mr. Harold Price
Director of Regulations
U. S. Atomic Energy Commission
Washington, D. C. 20545

Dear Mr. Price:

This is in response to Mr. Boyd's letter of October 5, 1967, transmitting a copy of Amendment No. 2 to the application by the Metropolitan Edison Company for construction permit for the proposed Three Mile Island Nuclear Station, Unit 1, Dauphin County, Pennsylvania, Docket No. 50-289.

We have reviewed Volume 4 of the Preliminary Safety Analysis Report, which contains answers to questions raised by the Commission concerning the application for the above plant.

With regard to the applicant's answer to question 2.62 of Volume 4, which describes the pre-operational monitoring program, we urge that the applicant comply with those specific recommendations dealing with aspects of the pre-operational environmental monitoring program as listed in our letter of September 26, 1967, to the Atomic Energy Commission. We would like to reemphasize that determination of background radiation in the pre-operational environmental monitoring program also includes samples of river sediments, crustaceans, and molluscs, if available.

The opportunity to provide comments on the amendment is appreciated.

Sincerely yours,

(SGD) CLARENCE F. PAUTZKE

Commissioner
