Regulatory Docket File

Mr. J. P. O'Reilly, Director
Office of Inspection and Enforcement, Region 1
U. S. Nuclear Regulatory Commission
631 Park Avenue
King of Prussia, PA 19406

Dear Sir:

Docket No. 50-289
Operating License No. DPR-50

On October 14, 1976, Metropolitan Edison Company sent Event Report 76-32/3L which concerned leakage from either the "A" or "B" Makeup and Purification System Letdown Cooler. At that time, the location was not known, but it was stated that repairs would be performed during a future plant outage.

During this refueling outage, hydrostatic tests were conducted on the "B" Cooler which indicated that it was not leaking. The "A" Cooler was confirmed to be leaking through operational test results and was replaced.

Sincerely,

R. C. Arnold
Vice President
