JAN 16 1975

Mr. George Lear, Chief
Operating Reactors Branch #3
Directorate of Licensing
U.S. Atomic Energy Commission
Washington, D.C. 20545

Dear Mr. Lear:

This is to acknowledge receipt of five copies of the draft Babcock & Wilcox (B&W) Standard Technical Specifications (STS) and your forwarding letter of January 9, 1975. As indicated during our meeting of December 11, 1974, Metropolitan Edison Company will review and comment on the STS based upon the experience gained to date in the start-up testing and operation of Three Mile Island Unit 1.

It is our understanding that subsequent utilization of the STS for the TMI Unit 1 operating license will only take place after appropriate discussions concerning specific provisions to tailor the STS for TMI Unit 1 and development of implementation schedules. Further, it is our understanding that the AEC's intent is for the Technical Specifications for TMI Unit 2 to be the same as the Technical Specifications for TMI Unit 1.

Since we only received the updated copies of the STS draft on January 15, it may be difficult to hold to your suggested schedule for review. Although we have not looked at the STS in any detail, so that the magnitude of the review effort is not defined, our initial reaction is that we should be able to come close to the time frames which your schedule sets forth.

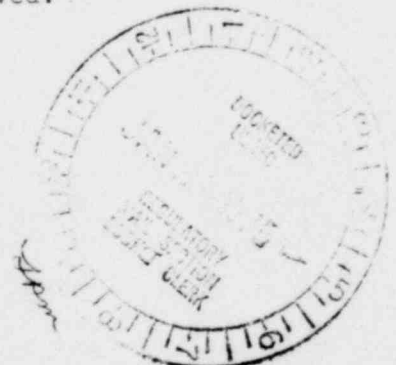

We shall endeavor to meet the target of February 24, 1975, for the first-round comments and questions on Sections 1.0, 2.1 and 2.2, and will inform you if at any time it appears that this cannot be achieved.

Sincerely,

R. C. Arnold
