Mr. Karl L. Goller
Assistant Director for Operating Reactors
Directorate of Licensing
U. S. Atomic Energy Commission
Washington, D.C. 20545

Dear Mr. Goller:

Subject: Docket No. 50-289
Operating License DPR-50

As a follow-up to our letter of October 1, 1974, and in response to your letter of September 8, 1974, our schedule for the alarming of all exterior grade-level doors at our Three Mile Island Nuclear Station, Unit 1 (TMI-I) is as follows:

<u>Project Stage</u>	<u>Anticipated Completion Date</u>
System Design	January 1, 1975
Writing of Specifications	February 15, 1975
Solicitation and Evaluation of Bid Proposals	April 15, 1975
Procurement and Fabrication of Equipment	August 15, 1975
Installation and Testing of Equipment	October 1, 1975
Alarm System Operational and Incorporated into TMI-I Operations by a Revision to the Industrial Program	October 25, 1975

Please understand that this schedule is tentative and is subject to delays (such as procurement of equipment) over which Met-Ed has little or no control. Should we encounter delays, we will so notify you and revise the schedule accordingly.

1585 081

11162

With regard to the continued protection of vital areas until installation and testing of the alarms has been completed, please recall that all exterior grade-level doors are being patrolled at least twice every eight-hour shift (see the enclosure to our letter of August 30, 1974), and we intend to continue this practice until the doors have all been alarmed.

We trust that the information as provided herein is responsive to your concerns; and due to the confidential nature of this information, we ask that it be treated in a proprietary manner.

Sincerely,

R. C. Arnold
Vice President
