Regulatory Docket File

November 12, 1973

Mr. A. Giambusso
Deputy Director for Reactor Projects
Directorate of Licensing
Office of Regulation
U.S. Atomic Energy Commission
Washington, DC 20545

SUBJECT: THREE MILE ISLAND NUCLEAR STATION
UNIT 1
DOCKET NO. 50-289

Dear Mr. Giambusso:

Enclosed please find fifty (50) copies of the report entitled "Ring Girder Surveillance". This report is intended to provide you with complete information concerning our surveillance of the ring girder to date in fulfilling of previous commitments to you.

These commitments may be found in the following:

1. "Report on the Containment Building Ring Girder Construction and Repair," December 7, 1971. Section 6:01.
2. "Addendum to the Ring Girder Report", January 21, 1972. Sections 2.0 and 3.0.

All observations indicate that the repaired ring girder has fulfilled the intended design function at the completion of full prestress. No cracks equal to or greater than 0.005 inches in width have been observed. In no case do the stresses in the reinforcing bars being monitored by strain gages exceed the allowable tensile stress.

Very truly yours,

J. G. Miller
J. G. Miller
Vice President
