Director of Nuclear Reactor Regulations  
Attn: R. W. Reid, Chief  
Operating Reactors Branch No. 4  
U. S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Dear Sir:

Three Mile Island Nuclear Station, Unit 1 (TMI-1)  
Operating License No. DPR-50  
Docket No. 50-289

Technical Specification Change Request No. 74 requested an amendment to the Tech. Specs. per the Commission's letter dated 11/7/77. The Commission reviewed this T.S.C.R. and proposed the following hardware changes as part of the change request:

1. Alarm MU-V16A/B/C/D to signal when they are not seated and the RCS temperature is less than 275°F.
2. Install pressure/temperature recorders, the pressure recorders must be capable of recording 100 psi/sec pressure changes.
3. Install a pressure alarm to indicate that the RCS pressure has exceeded 485 psig.

We have reviewed these proposed hardware changes and will include these in the modifications which will be made to Unit 1, prior to startup.

Sincerely,

J. G. Herbein  
Vice President-Nuclear Operations
