Arlington, Texas 76012

Ref: AGN-201M Reactor, Docket No. 50-252

As required by IE Bulletin No. 79-19 we have conducted an audit of our activities associated with the transfer, packaging, and transport of low-level radioactive waste.

The nature of our operation essentially precludes all such activities. Any materials with actual or suspected contamination are transferred to the University's Radiological Safety Office for disposal under the terms of the State of New Mexico's agreement with the U.S.N.R.C.

This letter satisfies our obligations under the terms of the Circular. Any questions or comments may be directed to me.

Sincerely,

Ronald A. Knief  
Associate Professor and  
AGN-201M Chief Reactor Supervisor
