

July 30, 1979

Dear Harold Denton,

The utility companies are pushing to open the Salem-2 reactor. I say no more licenses granted until the TMI studies are completed. It is only right that one should learn from one's mistakes and not just keep bungling along. I am putting it mildly.

Be responsible Harold Denton - don't let your power go to your head. TMI was almost a level-9 disaster and it isn't the first of serious accidents. Wake up to the reality of nuclear dangers!
