Dear Director:

Because of the desire of this office to be responsive to all inquiries and communications, your consideration of the attached is requested. Your findings and views, in duplicate form, along with return of the enclosure, would be greatly appreciated. It would also be helpful to me if your response is mailed to my office at the address below and INCLUDES THE FILE NUMBER SHOWN ON THE COMMUNICATION I HAVE SENT TO YOU.

Cordially,

Richard (Dick) Stone

Gen'l Anti-Nuclear
-1846
11 June

Senator Richard Stone,

The Crystal River Nuclear Power Plant is due to re-open in a week's time. As I see it, the problems regarding safety have not been solved. The essential design of the plant has not been changed. Physicians do not know the effects the bombardment of atoms will have on those metals after years of use. And there is no adequate means of storing the wastes nor will there ever be. They're radioactive, corrosive and deadly. They are presently seeping into our water systems or blowing up on our railroads and readily getting into the food chain. Lower life forms are already affected. It's just a matter of time before it shows up in humans. The threat of my children or grandchildren developing leukemia or genetic mutations has changed my life. My fear is too great to verbalize but it is well founded. Were we the people consulted when these monstrosities were built? No! I live here and love it and I don't want nuclear anymore. There are cleaner safer alternatives now. We must act now to save our future for the sake of the children! Remember, you are responsible to the people, not the corporate

Just because radiation cannot be seen or felt,
it must not be ignored.

Sincerely,

Larry Griffin
