

United States Senate

WASHINGTON, D.C. 20510

50-3390L

November 20, 1979

Mr. Joseph M. Henrie  
Chairman  
Nuclear Regulatory Commission  
1770 H Street, NW  
Washington, D. C. 20555

Dear Mr. Henrie:

This letter is to acknowledge receipt of a copy of a letter to you from Mr. Charles Horne, Jr. of the Greenville Utilities, Greenville, North Carolina, dated November 7, 1979. In his letter, Mr. Horne urges you to take whatever reasonable steps to expedite the licensing of Virginia Electric Power Company's North Anna No. 2 nuclear unit.

I, too, would like to express to you my utmost concern for the speedy processing, and for your support of VEPCO's application for licensing of their nuclear plant. Due to the decision of President Carter to no longer import Iranian oil, the licensing of this nuclear unit would be in effect a positive step toward lessening the United States' dependence on foreign oil. Additionally, the eastern North Carolina electric customers serviced by VEPCO would be paying a cheaper price for their electricity.

I would appreciate any assistance and consideration you might lend toward the licensing of VEPCO's North Anna No. 2 nuclear unit.

With best wishes.

Sincerely,

  
Robert Morgan
