Docket No. STN 50-545

Mr. Domenic B. Vassallo, Assistant Director
Light Water Reactors
Division of Project Management
Office of Nuclear Reactor Regulation
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Subject: Amendment to Application for Two-Year Extension of the
Preliminary Design Approval for RESAR-3S

Dear Mr. Vassallo:

Enclosed are sixty (60) copies of Amendment 15 to RESAR-3S, the Reference Safety Analysis Report for the Westinghouse 3411 MWt Nuclear Steam Supply System. Amendment 15 is submitted in response to the December 13, 1979 request for additional information by Domenic B. Vassallo, Acting Director, Division of Project Management, requesting the assessment of recent matters as approved or scheduled for review by the RRRC since September 1, 1978. The amendment is confined to Appendix 3B of RESAR-3S which addresses the regulatory matters in Category I, II, III and IV according to the Commission's August 22, 1978 policy statement on standardization. Westinghouse submitted Appendix 3B as Amendment 14 on December 15, 1978.

Amendment 15 provides the additional information as requested to further approval of a two-year extension of PDA-7; but other than ATWS the subjects are interface in nature and not Westinghouse scope.

If you have any questions or comments concerning this submittal, we will be pleased to meet with you at your convenience.

Very truly yours,

T. M. Anderson, Manager
Nuclear Safety Department

/bek
Enclosure
