Subject: [External_Sender] YNHH visiting AU at Bridgeport Hospital

Hi Tara,

612538
NNSC/RGNI MATERIALS-002

Rec'd in LAT-07/25/2019

The YNH Radiation Safety Committee met today and reviewed the credentials of Dr. Jacqueline Kelly to serve as an Authorized User under our NRC broad scope license. She was unanimously approved by the RSC for 35.300 (> 33 mCi NaI-131 and parenteral administration of beta emitters, or photon-emitting radionuclides with a photon energy less than 150 keV, for which a written directive is required), 35.400 (manual brachytherapy) and 35.600 (HDR and GSR) uses. Please refer to the attached document.

Since, she will also be working at the Bridgeport Hospital Radiation Oncology facility, we would like to inform you that she will be operating as a visiting Authorized User at Bridgeport for 35.300 (Ra-223 Xofigo) and 35.600 (HDR) uses, until her status there is finalized by the license amendment, which is currently in process.

Regards,
