Samuel J. Chilk
Office of the Secretary
United State Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Chilk:

We are advised that it would be prudent for us to file a letter of intent indicating our wish to be allowed to speak at future public proceedings involving the construction of a new power plant in the Town of New Haven.

We believe that if New York State Electric and Gas's power plant is allowed to be constructed there will be some impact upon our township which lies immediately adjacent to the area.

At this point we are impressed with the regulatory agencies' and power company's effort to inform the public.

Sincerely,

A handwritten signature in dark ink, appearing to read "MRG".

Mark R. Gibbs
Town Supervisor
For the Board
Town of Mexico
