

NRC PUBLIC DOCUMENT ROOM

UNITED STATES OF AMERICA
NUCLEAR REGULATORY COMMISSION

Before the Atomic Safety and Licensing Board

In the Matter of)
LONG ISLAND LIGHTING COMPANY)
(Shoreham Nuclear Power Station,)
Unit 1))

Docket No. 50-322

APPLICANT'S REPLY TO MR. LIKE'S
LETTER OF JUNE 6, 1979

Mr. Like has presented a request from the Suffolk County Legislature "that the Nuclear Regulatory Commission require that the Long Island Lighting Company conduct a study of the feasibility and cost of converting the Shoreham Electric Generating Station [sic] from nuclear to conventional or alternative fuel." Letter from Irving Like to Elizabeth S. Bowers, June 6, 1979. The request is misdirected.

In his letter, Mr. Like made no effort to explain why Mrs. Bowers (or the Board as a whole) has authority to order that the study in question be conducted. No related issue is pending before the Board. Even if there were such an issue, each party would remain free to shape its own response.

In any event, all that Mrs. Bowers has received is a letter, not a motion requesting that the Board actually do

345 079

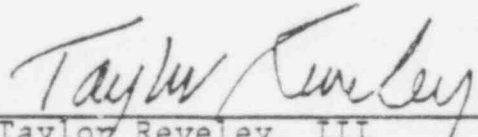

something. As a lawyer who has practiced extensively at the NRC bar, Mr. Like knows that (a), when an ASLB's jurisdiction is not clear, you address the issue and (b), when you want an ASLB to act, you file a motion. His disregard of these requirements is telling.

The County Legislature would have been better served had Mr. Like recommended that it approach the Applicant directly about the desired study. LILCO is presently analyzing the feasibility and cost of converting Shoreham from nuclear to coal generation. The Company will be happy to make its findings available to the Legislature.

Respectfully submitted,

LONG ISLAND LIGHTING COMPANY
