Director, Office of Nuclear Reactor Regulation
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Sir:

Docket 50-305
Operating License DPR-43
Security Plan Revision

The Kewaunee Nuclear Power Plant Industrial Security Manual has been revised to correct editorial errors, incorporate as-built plant vital area boundaries and update the designated vehicles list per commitments made in our response to I&E Inspection Report No. 79-04, and modify specific plan requirements using equivalent measures as a result of experience gained to date. None of the changes to the security plan decrease the safeguards effectiveness of the overall security program. Pursuant to the requirements of 10CFR50.54(p) the attachment to this letter provides a description of each change made under this revision. Five copies of Kewaunee Plant Industrial Security Manual Revision No. 1 are enclosed for your use. The changes made by this revision do not reduce the effectiveness of the security program and, therefore, are not subject to a fee pursuant to 10CFR170.22.

The attachment to this letter and the copies of Revision No. 1 are considered exempt from public disclosure according to 10CFR Section 2.790. Therefore, it is requested that these documents not be placed in the Public Document Room.

Very truly yours,

A handwritten signature in cursive script that reads "E. R. Mathews".

E. R. Mathews, Vice President
Power Supply & Engineering
