### VERMONT STRIKE

I am amazed and disturbed to hear on radio news that administrative personnel are being allowed to operate the Vernon Yankee nuclear power plant in Vermont during the current strike.

As you probably know, this plant is locally notorious — we own land in Vermont and know all too well — for radiation leakage and other hazards.

I respectfully but urgently request that you order a cold shut down until the labor dispute is resolved. This is no job for amateurs. Vermont is too pretty to lose.
