

**Radiation Safety Committee
Memorandum**

Yale
New Haven
Health
Yale New Haven
Hospital

TO: Jacqueline Kelly, M.D.
FROM: Michael J. Bohan, Radiation Safety Officer
DATE: July 24, 2019
SUBJECT: Approval as an Authorized User

06-01060-01
03001247

It is my pleasure to inform you that at the last meeting of the Yale-New Haven Hospital Radiation Safety Committee, on July 24, 2019, your credentials were presented and approved by the committee for the following areas of byproduct material use:

- 10 CFR Part 35.300 (I-131 for thyroid cancer & hyperthyroidism and parenteral administration of beta-emitters, or photon-emitting radionuclides with a photon energy less than 150 keV, for which a written directive is required)
- 10 CFR Part 35.400 (manual brachytherapy)
- 10 CFR Part 35.600 (high dose rate brachytherapy & gamma stereotactic radiosurgery)

The Committee has determined that you meet the training and experience requirements specified in sections (b)(1), (2) & (3) (preceptor statements) for 10 CFR 35.300 (radiopharmaceuticals requiring a written directive), signed by Dr. Lawrence Saperstein. In addition we have a preceptor statement signed Dr. James Yu, which shows that you have been trained for both low and high dose rate brachytherapy and for gamma stereotactic radiosurgery (35.400 & 35.600).

Therefore, you are hereby approved as an Authorized User under the NRC Broad Scope License No.: 06-00819-03, to use byproduct material radioisotope sources for the previously described uses. Although, you can now begin to practice in these areas of use, please be sure to familiarize yourself with our local policies, procedures and practices before initial independent use.

Please call us at (203) 688-2950, if you have any questions.

Michael J. Bohan

YNHH Radiation Safety Officer
