RE: Turkey Point Nuclear Plant, Unit 3 and 4
Docket Nos. 50-250 and 50-251
Renewed Facility Operating Licenses DPR-31 and DPR-41

Supplement to License Amendment Request 258, Revise Reactor Core Safety Limit to Reflect WCAP-17642-PA Revision 1

Reference:

FPL Letter L-2018-065, License Amendment Request 258, Revise Reactor Core Safety Limit to Reflect WCAP-17642-P-A, Revision 1, May 3, 2018 (ADAMS Accession No. ML18123A552)

In the referenced letter, Florida Power & Light Company (FPL) requested amendments to Renewed Facility Operating Licenses DPR-31 and DPR-41 for Turkey Point Nuclear Plant Units 3 and 4 (Turkey Point), respectively. The proposed license amendments revise the Turkey Point Technical Specifications (TS) by revising Reactor Core Safety Limit (SL) 2.1.1.b, to reflect the peak fuel centerline melt temperature specified in WCAP-17642-P-A, Revision 1, "Westinghouse Performance Analysis and Design Model (PAD5)".

In the referenced letter, FPL also stated that the approved amendments will be implemented for the Unit 3 Cycle 31 and Unit 4 Cycle 32 reload campaigns scheduled in Spring 2020 and Fall 2020, respectively. Due to unforeseen delays, FPL will implement the amendments for the Unit 3 Cycle 32 and Unit 4 Cycle 32 reload campaigns, currently scheduled in Fall 2021 and Fall 2020, respectively.

Should you have any questions regarding this supplement, please contact Mr. Robert Hess, Turkey Point Licensing Manager, at 305-246-4112.

This letter contains no regulatory commitments.

I declare under penalty of perjury that the foregoing is true and correct.

Executed on the 14th day of August 2019.

Sincerely,

A handwritten signature in black ink, appearing to read 'Brian Stamp', written over a horizontal line.
