Subject: Email: Summary of secure call with GLE to discuss the security plan submitted via GLE letters GLE-2019-0094 and GLE-2019-0103
Date: Monday, August 19, 2019 9:21:01 AM

Email: NRC Meeting Summary of Secure Call Held with Global Laser Enrichment on July 25, 2019

Summary:

On July 25, 2019, the U.S. Nuclear Regulatory Commission (NRC) staff held a secure call with staff from General Electric Hitachi, Global Laser Enrichment (GLE) to discuss a proposed security plan submitted via letters dated May 30, 2019, GLE-2019-0094 (Agencywide Documents Access and Management System (ADAMS) ML19164A321) and revision dated June 27, 2019, GLE-2019-0103 (ADAMS Accession No. ML19207A091). The NRC, in consultation with the U.S. Department of Energy, Office of Classification, determined the security plan requires modification to ensure adequate security. Therefore, GLE is evaluating if they will withdraw the proposed security plan or submit an update. The NRC and DOE's review is on hold pending a response from GLE on their proposed path forward.

Meeting Participants:

NRC:

Keith Everly, NSIR;
Darryl Parsons, NSIR;
Jake Zimmerman, NMSS;
Matt Bartlett, NMSS;

GLE:

Pat Jenny, GLE
Tom Owen, GLE

Sincerely,

Matt Bartlett
