

Summary of Changes to One Procedure that Implements the Radiological Emergency Response Plan (RERP) for Wolf Creek Generating Station (WCGS)

**1. Procedure EPP 06-008, "Re-Entry, Recovery and Termination Operations,"
Rev. 1A**

The procedure is being revised to change guidance for entry into event recovery/termination to match guidance in Procedure EPP 06-005, "EMERGENCY CLASSIFICATIONS." The revised wording improves understanding, does not change the intent of the steps and has been approved through the standard revision process for EPP 06-005. The steps have been renumbered. A new step has been added to indicate the records generated during an actual event are forwarded to Document Services for records retention.

These changes do not reduce the effectiveness of the Emergency Plan.
