**Subject:** [External\_Sender] Revised Operating Procedures for BRR  
**Date:** Monday, August 26, 2019 11:58:22 AM  
**Attachments:** [Letter Authorization Oper Proc Fix.pdf](#)

---

Bernie,

As you have discussed with Michael Dunsmuir this morning, there is an administrative issue with the shipment of the BRR package under the new certificate (Rev. 8). The documents needed to support shipments from Rhode Island and MURR have been developed utilizing the letter that was issued by NRC on August 5, 2019. That letter had the purpose of incorporating some corrections to the operating procedures and expires on September 30, 2019. The above-referenced shipments to Savannah River are scheduled to occur after this date. While Rev. 8 of the certificate incorporates these corrections formally, unfortunately the documents already completed for the upcoming shipments are supported by the letter of August 5. I am told there would be a significant delay and expenditure of manpower to revise the documents to change the basis to Rev. 8 of the certificate. Therefore, Orano Federal Services requests that the August 5 letter be revised to extend the expiration date of the authorization to December 31, 2019.

For your reference, a copy of the August 5 NRC authorization letter is attached. If you have any questions, please contact me. Thank you for your assistance.
