Southern Nuclear Operating Company
Vogtle Electric Generating Plant (VEGP) – Unit 3
Scheduled Date for Initial Loading of Fuel

Ladies and Gentlemen:

Pursuant to 10 CFR 52.103(a) Southern Nuclear Operating Company (SNC), the licensee for Vogtle Electric Generating Plant (VEGP) Unit 3 Combine License (COL) Number NPF-91, is hereby notifying the U.S. Nuclear Regulatory Commission (NRC) of the scheduled date for initial loading of fuel at VEGP Unit 3 on [date]. SNC is submitting this notice in parallel with the Notice of Uncompleted ITAAC to support publication of the notice of intended operation 285 days prior to scheduled fuel load. SNC respectfully requests that the notice of intended operation be published in the federal register in accordance with 10 CFR 52.103(a).

Updates to the scheduled date for initial loading of fuel will be made every 30 days in accordance with 10 CFR 52.103(a) and VEGP Unit 3 COL condition 2.D.(11).

Should you have any questions regarding this information, please contact Michael Yox at (706) 848-6459.

Respectfully submitted,

SOUTHERN NUCLEAR OPERATING COMPANY

Docket No.: 52-025

ND-20-0XXX
10 CFR 52.99(c)(3)U.S. Nuclear Regulatory Commission
Document Control Desk
Washington, DC 20555-0001Southern Nuclear Operating Company
Vogtle Electric Generating Plant Unit 3
Notice of Uncompleted ITAAC XXX(315)-days Prior to Initial Fuel Load

Ladies and Gentlemen:

Pursuant to 10 CFR 52.99(c)(3), Southern Nuclear Operating Company (SNC), the licensee for Vogtle Electric Generating Plant (VEGP) Unit 3 Combined License (COL) Number NPF-91, hereby notifies the NRC that as of January XX, 2020, Inspection, Test, Analysis, and Acceptance Criteria (ITAAC) items listed in Enclosure 1 will not be completed XXX(315)-days prior to initial fuel load currently scheduled for XX, 2020. Enclosure 1 lists all VEGP Unit 3 Appendix C ITAAC for which required inspections, tests, or analyses have not been performed or have been only partially completed along with the corresponding UIN. SECY-15-0010 allows for the notice of intended operation to be published up to 75 days earlier than the 210 days before scheduled fuel load based on SNC's voluntary early submission of its UINs. SNC is submitting this Notice of Uncompleted ITAAC XXX(315)-days prior to initial fuel load in support of the publication of the notice of intended operation 285 days prior to scheduled fuel load.

This notification is informed by the guidance described in NEI 08-01, *Industry Guideline for the ITAAC Closure Process Under 10 CFR Part 52*, which was endorsed by the NRC in Regulatory Guide 1.215. In accordance with NEI 08-01, this notification includes ITAAC for which required inspections, tests, or analyses have not been performed or have been only partially completed. All ITAAC will be fully completed and all Section 52.99(c)(1) ITAAC Closure Notifications will be submitted to NRC to support the Commission finding that all acceptance criteria are met prior to plant operation, as required by 10 CFR 52.103(g).

This letter contains no new NRC regulatory commitments.

If there are any questions, please contact Tom Petrak at 706-848-1575.

Respectfully submitted,
Michael J. Yox
Regulatory Affairs Director Vogtle 3 & 4

Commented [LS1]: COL specifies to notify Director of NRO.
Since NRO no longer exists at this point, the letter is
addressed to the Director of NRR.

Southern Nuclear Operating Company
Vogtle Electric Generating Plant Unit 3
Notification of Completion of All ITAAC

Ladies and Gentlemen:

Pursuant to 10 CFR 52.99(c)(4), and in accordance with Vogtle Electric Generating Plant (VEGP) Unit 3 Combined License (COL) NPF-91 condition 2.D.(2)(d), Southern Nuclear Operating Company (SNC) hereby notifies the NRC that all of the inspections, tests, analyses and acceptance criteria (ITAAC) in VEGP Unit 3 COL Appendix C have been successfully completed.

ITAAC Closure Notifications have been submitted to the NRC for each ITAAC in VEGP Unit 3 COL Appendix C in accordance with 10 CFR 52.99(c)(1). All of the ITAAC Closure Notifications are substantiated by ITAAC Completion packages, which include the documentation (tests, reports, completed procedures, completed analyses, etc.) that support the ITAAC determination bases. The ITAAC completion packages are available for NRC inspection at the plant site.

SNC is not aware of any condition that warrants submittal of an ITAAC Post-closure Notification under 10 CFR 52.99(c)(2) and hereby affirms the completion of all ITAAC prescribed in the combined license for VEGP Unit 3. On this basis, SNC requests that NRC staff make a finding that the acceptance criteria in the combined license are met (10 CFR 52.103(g)).

If there are any questions, please contact Michael Yox at 706-848-6459.

Respectfully submitted,
