General Comment

I agree that they should continue to allow the collection of information in the domain of nuclear powers and nuclear regulations. There should be people who can collect information about nuclear regulation because, with the growing use of nuclear power and other things, with people knowing how to regulate this potential issue and help to possibly fix it or contain it if necessary. There needs to be people that can be allowed to collect this information and then build up banks of information, that can be useful to our countries and its allies, and then put that information to good use.
