Dear Sr. Project Manager Maupin, Sr. Level Advisor McCartin and NRC Commissioners:

We are requesting 90 additional days to comment on the Draft Regulatory Basis for the Disposal of Greater-than-Class-C (GTCC) and Transuranic Waste, Docket ID NRC-2017-0081.

The technical and practical implications of this potential rule change are complicated and we need additional time to understand and analyze them.

We also are concerned that segmenting this part of 10 CFR 61 from the rest of the rule change could have unexpected consequences.

The webinar on August 22 was helpful but also raised many questions that we wish to consider in providing feedback on the Draft Regulatory Basis.

Some of our groups have been tracking the changes closely and some are newer to the 10 CFR 61 regulations and potential changes.

We would be very grateful for the additional time to provide thoughtful, technically supported

comments. If it is possible to notify us of your decision soon that would also be appreciated.

Thank you,

POC: Diane D'Arrigo
