Atlanta, Georgia 30303

Serial No. 455A  
PSE&C/CGC:mac:wang  
Docket No. 50-339

Dear Mr. O'Reilly:

On June 1, 1979, a report was made under the provisions of 10CFR50.55(e) concerning an electrical fault which occurred on a Class 1E 480 volt motor control center supplied by Klockner-Moeller Corporation.

On June 6, 1979, we submitted a report (S.N. 455) which was intended to be the five day letter required under the provisions of 10CFR21; however, we mistakenly neglected to make any reference to 10CFR21 in that letter.

The purpose of this letter is to inform you that S.N. 455 should be considered our five day letter under the provisions of 10CFR21, and, as stated in item 4 of S.N. 455, it should also be considered our final report under the provisions of 10CFR50.55(e).

Should you require further information, please contact this office.

Very truly yours,

Sam C. Brown, Jr.  
Senior Vice President - Power Station  
Engineering and Construction

cc: Director, Office of Inspection  
and Enforcement (3)
