United States Nuclear Regulatory Commission  
Region II, Suite 1217  
230 Peachtree Street, N. W.  
Atlanta, Georgia 30303

Subject: Virgil C. Summer Nuclear Station  
NRC Bulletins 78-12 and 78-12A/12B  
Re: RII:JPO  
50-395

Dear Mr. O'Reilly:

Based upon the Westinghouse (W) technical evaluation of information contained in a generic report prepared by Chicago Bridge & Iron Company (CB&I) which addresses the requirements of the above referenced bulletins, W has concluded that weld material data and other required information pertaining to the Virgil C. Summer (CGE) reactor vessel are included in the CB&I report. This report was submitted earlier to the Nuclear Regulatory Commission (NRC) and is evidenced by CB&I's transmittal letter enclosed as Attachment A.

Additionally, a copy of CB&I's letter to W is enclosed as Attachment B, which provides further confirmation that the CB&I generic report includes records pertaining to the Virgil C. Summer (CGE) reactor vessel.

Should you have further questions or require additional information concerning this matter, please contact us.

Very truly yours,

E. H. Crews, Jr.
