Office of Nuclear Reactor Regulation  
U.S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Dear Sir:

Enclosed are three (3) originals and forty (40) copies of Technical Specification Change Requests No. 42 and 47 requesting amendment to Appendix A of Operating License DPR-72. As part of these requests, proposed replacement pages for Appendix A are enclosed.

Florida Power Corporation considers Change Request No. 42 to be a Class III amendment per 10 CFR 170.22 as it involves a single safety issue. This request represents a licensing fee of four thousand dollars (\$4,000).

Florida Power Corporation is requesting an expeditious review of this change. This technical specification change is required prior to startup after completion of the planned ECCS modification. This modification could be accomplished as early as July 22, 1979.

Change Request No. 47 is considered to be a Class III amendment per 10 CFR 170.22 as it involves a single safety issue. This amendment is exempt from licensing fees because it results from a written Commission request for Technical Specifications (NOTE: To 10 CFR 170.22). The Commission's request is referenced in the Change Request.
