

DOCKET NUMBER 11000495  
EXPORT IMPORT

June 4, 1979

Nuclear Regulatory Commission  
Atomic Safety & Licensing Board Panel  
Washington, D. C. 20555

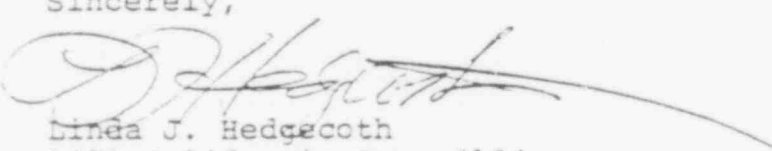

Dear Sirs:

Please stop the export of Nuclear Power Plants to Third World countries. These countries are most likely to use these plants for the development of nuclear weapons, thus escalating the possibility of nuclear war or nuclear terrorism.

The proposed Westinghouse plant to be licensed and built in the Philippines is as you probably know, near an earthquake fault and active volcanoes. The Philippines and other countries like them are ideal places for the use of small scale solar power and alternate energy sources. I realize that there is an obvious conflict of interest at the N.R.C., as your jobs depend on the existence of nuclear power; but consider the facts. The health of our nation and the whole planet depend on the end of this dangerous power source. Your future generations must live here too. Deny this license to Westinghouse and spare the Filipino people this unnecessary and dangerous threat to their future.

Sincerely,

  
Linda J. Hedgecoth
