In the Matter of Virginia Electric and Power Company
North Anna Power Station, Units 1 & 2
Docket Nos. 50-338 OL and 50-339 OL

Gentlemen:

At the public hearing on turbine missiles June 20 I promised to submit to the Board a proposed protective order covering the proprietary Westinghouse data on the malfunctions of the components used in Dr. Shaffer's fault tree analysis. I have not been able to provide the supporting documents for that proposed order as quickly as I had hoped, but I am continuing to assemble those documents.
