Mr. Karl V. Seyfrit, Director
Nuclear Regulatory Commission
Region IV
Office of Inspection and Enforcement
611 Ryan Plaza Drive, Suite 1000
Arlington, Texas 76011

Subject: Environmental Qualifications
Docket No. 50-267

Reference: IE Bulletin 79-01

Dear Mr. Seyfrit;

The Fort St. Vrain Environmental Qualification program was thoroughly reviewed by NRC-NRR and NRC-I & E Region IV with the Public Service Company of Colorado in 1977 and 1978. All environmental qualification data was reviewed at the site by NRC-I & E Region IV during this period, and the matter was closed out in Amendment 18 to the Facility Operating License DPR-34, dated October 28, 1977. The most relevant correspondence between PSC and NRC during this period are listed in Attachment A to this letter. The environmental qualification of connectors, penetrations, terminal blocks and limit switches of concern to the NRC were addressed in separate correspondence, and these documents are also listed in Attachment A.

The documents listed in Attachment A fulfill all of the requirements for action by the Licensee contained in I & E Bulletin 79-01. In so far as all required action has been completed, no further action is required by PSC on this matter. PSC, therefore, considers I & E Bulletin 79-01 to be closed by submittal of this letter.

Very truly yours,

J.K. Fuller ^{by} *R.V. Hugo*

J.K. Fuller, Vice President
Engineering and Planning
