Mr. James P. O'Reilly, Director, Region II
Office of Inspection and Enforcement
U. S. Nuclear Regulatory Commission
101 Marietta Street, Suite 3100
Atlanta, Georgia 30303

Dear Mr. O'Reilly:

Re: RII:JPO
50-250, 50-251
IE Bulletin 78-12, 12A, 12B

The Babcock & Wilcox (B&W) report "Records Investigation Report Related to Off-Chemistry Welds in Material Surveillance Specimens and Response to IE Bulletin 78-12 and 78-12A", which was submitted by B&W to the NRC on March 13, 1979, has been endorsed by Westinghouse as applicable to the Turkey Point Unit 3 weld materials. Florida Power & Light Company (FPL) letter L-77-326 of October 21, 1977 and information provided to the NRC staff at an April 7, 1977 meeting are also related to reactor vessel materials. FPL is satisfied that the above mentioned information adequately represents data for the Turkey Point reactor vessels. We are also willing to supply additional information, if you feel this is necessary.

Very truly yours,

Robert E. Uhrig
Vice President
Advanced Systems & Technology
