Docket No. 50-336

Director of Nuclear Reactor Regulation
Attn: Mr. R. Reid, Chief
Operating Reactors Branch #4
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

References: (1) R. Reid letter to W. G. Council dated June 7, 1979.
(2) W. G. Council letter to R. Reid dated April 24, 1979.
(3) W. G. Council letter to R. Reid dated May 24, 1979.
(4) W. G. Council letter to R. Reid dated May 31, 1979.

Gentlemen:

Millstone Nuclear Power Station, Unit No. 2
Auxiliary Feedwater Operator

In Reference (1), the NRC Staff documented its evaluation of the responses to the concerns of I&E Bulletin 79-06B provided by Northeast Nuclear Energy Company (NNECO) by References (2), (3), and (4). Reference (4), in particular, summarized NNECO's proposal with respect to ensuring timely initiation of auxiliary feedwater as required.

This proposal was amended by the evaluation documented in Item (4) of Reference (1), wherein it was stated that:

"NNECO further committed to document that the operator assigned to this function will at the time of a transient requiring such action take immediate control of the main and auxiliary feedwater systems, with no other concurrent responsibilities, until the steam generator levels return to a stable condition."

In fulfillment of that commitment, please be advised that the existing applicable emergency procedures specify that the above-quoted actions be taken. NNECO continues to believe that all necessary actions required to ensure timely initiation of feedwater have been completed.

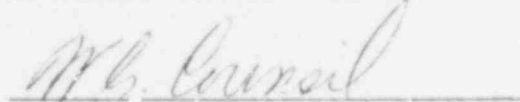

300 086

7907060282

We trust you find that the above information fulfills the Reference (1) commitment.

Very truly yours,

NORTHEAST NUCLEAR ENERGY COMPANY
