Mr. Harold R. Denton, Director  
Office of Nuclear Reactor Regulation  
U.S. Nuclear Regulatory Commission  
Washington, DC 20555

Dear Mr. Denton:

In the Matter of the ) Docket Nos. 50-259  
Tennessee Valley Authority ) 50-260

In accordance with the provisions of 10 CFR Part 50.59, we are enclosing 40 copies of a requested amendment to licenses DPR-33 and DPR-52 to change the technical specifications of Browns Ferry Nuclear Plant units 1 (Enclosure 1) and unit 2 (Enclosure 2). This requested change is made in conjunction with the proposed ASME Section XI inservice pump and valve testing program for Browns Ferry units 1 and 2, submitted by TVA letter from J. E. Gilleland to T. A. Ippolito dated April 16, 1979. This change is submitted pursuant to 10 CFR 50, Section 50.55a(g)(5)(ii) to make the technical specifications consistent with that program. Because this change is required to comply with Federal regulations no further justification is included.

Submittal of Class III fees for NRC review of the proposed Browns Ferry units 1 and 2 inservice pump and valve testing program was requested in a letter from Reba M. Diggs of the NRC License Fee Management Branch to H. G. Parris, TVA Manager of Power, dated May 11, 1979. In response to that letter, Class III fees were provided to the NRC. Because this requested change to the technical specifications is submitted in conjunction with that program and because the changes are required by regulation, no additional fees for review of this amendment will be forwarded.

Very truly yours,

TENNESSEE VALLEY AUTHORITY

*L. M. Mills*  
L. M. Mills, Manager  
Nuclear Regulation and Safety

Subscribed and sworn to before  
me this 20 day of July 1979.
