Mr. Boyce H. Grier, Director
Office of Inspection and Enforcement,
Region I
U.S. Nuclear Regulatory Commission
631 Park Avenue
King of Prussia, PA 19406

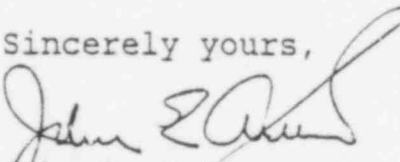

SUBJECT: IE Bulletin 79-09
Docket No. 50-485

RLNRC-0030

Dear Mr. Grier:

Your letter dated April 17, 1979 forwarded IE Bulletin 79-09 concerning failures of GE Type AK-2 circuit breakers in safety-related systems. The SNUPPS design of safety related systems (including Sterling Power Project Nuclear Unit No. 1) does not include any GE type AK-2 circuit breakers and none are planned for use in these systems. Because none of these circuit breakers will be used, no corrective action is required and none of the other action items of the bulletin are applicable to the Sterling unit.

Sincerely yours,

John E. Arthur
Chief Engineer
