FREEDOM OF INFORMATION ACT REQUEST

FOIA-79-181
MC 'd 5-15-79

Dear Mr. Grimsley,

As you suggested in our phone conversation yesterday, I am making a formal request to the Nuclear Regulatory Commission for records pertaining to nuclear plant operator training and testing. Specifically, I am interested in records pertaining to the 27 licensed operators at Davis-Besse Nuclear Plant 1, which is operated by Toledo Edison Co.

I understand that under privacy laws the medical records and names of these operators may be considered privileged information. I am interested, then, in finding the test scores (both written and simulator) of these operators, the last time each was licensed and the scheduled license renewal date for each and experience levels of the operators. From talking to both Toledo Edison and NRC Chicago officials, I understand all of the above information is required to be kept on file on each operator.

I am requesting all of the above information under the federal Freedom of Information Act.

Also, I would like information on where NRC conducts the operator tests and the types and construction of simulators which are used for testing. If you do not have this information, I would appreciate your forwarding the questions to the appropriate NRC personnel.

Thank you for your time and I look forward to a swift reply from NRC.

Cordially,

Betsy Hauser
