no response to date
not discouraging

President Carter,

It has been a year
and 5 months that I
wrote to you and sent
literature on the Perkins
Power Plant and begged
for your help - and I've
never received an answer.
I know and fully realize
that you have things to
do that's lots more
important to you - But
to me (1 million others)

ORIGINAL

this is a very important
issue — OUR LIVES may
depend on it! I'm
really not educated enough
to word what I'd like
to say to The President
of our Country — but I
begg of you, from the
bottom of my heart, to
please help us to stop
the building of the Pickens
Power Plant. There are
other sites that are a lot
better location & not

POOR ORIGINAL

as if perine to build.
I feel we have some
sort of "Water Gate" here,
as there is just too
much against this plant
being built. It has been
a constant battle. PLEASE
help us protect our
future drinking water
supply & wild life. We,
The Little People, are
trying to voice what we
want - Won't some one
listen?

POOR ORIGINAL

I don't suppose you
will get this letter
either - but this is
very important to me.

Thank you,
Truly yours,
(Mrs.) Barbara Hford
