EVENT DESCRIPTION AND PROBABLE CONSEQUENCES (10)

0 2 During the course of performing maintenance on the "B" H<sub>2</sub>O<sub>2</sub> analyzer the oxygen cell  
0 3 was found to be defective on July 12, 1979. The failure caused the analyzer to be  
0 4 inoperative. The inoperability was reported to the shift supervisor but it was not  
0 5 determined to be a limiting condition for plant operation until July 15, 1979 when  
0 6 it was noted the AC power was off. The "A" analyzer was operable. This is not a  
0 7 recurring problem.

0 27 9

CAUSE DESCRIPTION AND CORRECTIVE ACTIONS (27)

1 0 | A broken wire on the oxygen cell was found to be the problem. A new cell was

1 1 | ordered and should be installed by August 10, 1979. The cause for the wire breaking

1 2 | could have been many different things due to the extreme delicacy of the cell.
