500 SOUTH 27TH STREET, DECATUR, ILLINOIS 62525

July 20, 1979

Mr. James G. Keppler
Director, Region III
Office of Inspection & Enforcement
U. S. Nuclear Regulatory Commission
799 Roosevelt Road
Glen Ellyn, Illinois 60137

Dear Mr. Keppler:

Reference: Letter, G. E. Wuller to J. G. Keppler 7/5/79;
L08(07-05)-9, U-0098

The purpose of this letter is to amplify our response to IE Bulletin 79-02. Illinois Power Company is cooperating with Commonwealth Edison Co. and three other utilities in a program of dynamic testing of expansion anchors.

The program will be conducted in accordance with a Sargent & Lundy specification. Resulting data will be used, where appropriate, to ensure proper design of Clinton Power Station. Test results, (which will be designated proprietary to the five participating utilities), will be available to the NRC following completion of the program.

Sincerely,

G. E. Wuller
Supervisor - Licensing
