Docket No. 50-339

Dear Mr. Denton:

ELECTRICAL PROTECTION OF CONTAINMENT
PENETRATIONS FOR NORTH ANNA, UNIT 2

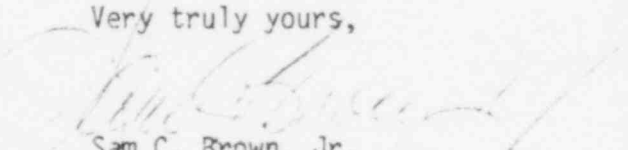

We have reviewed your letter dated August 3, 1979 and we have the following comments:

We are presently reviewing the capabilities of our protective devices and their coordination with the limits of the containment penetration feedthroughs. From this comparison we can then formulate the exact requirements for each feed.

Due to the large number of devices that must be evaluated, we will not be able to give exact information on our plan of action until September 4, 1979.

If you feel that you need more information prior to our submittal on September 4, 1979, please do not hesitate to call this office.

Very truly yours,

Sam C. Brown, Jr.
Senior Vice President - Power Station
Engineering & Construction

cc: Mr. James P. O'Reilly, Director
Office of Inspection & Enforcement
Region II
